**“...a much-needed antidote to the fruitless incrementalism that dominates contemporary debate.”**

David E. Williams, HealthBusinessBlog.com

### **The Abandonment of the American Patient Is No Mistake**

In the epic battle between the Wonkonians (who want to regulate our way out of our healthcare mess) and the Gekkonians (who insist that for-profit healthcare is the solution), American patients have been left out in the cold. But what they don't realize is that their abandonment - by the insurers, by the government, and even by their doctors - is not merely an unfortunate side effect of our dysfunctional healthcare system. *It is purposeful and systematic.*

In *Fixing American Healthcare – Wonkonians, Gekkonians, and the Grand Unification Theory of Healthcare*, Richard N. Fogoros, MD explains the American healthcare system in a way you've never heard it explained before. Fogoros uses his Grand Unification Theory of Healthcare to show what's really behind the frustration, the disarray, and the heartache that defines the American healthcare system - and then, to find a uniquely American solution to our burgeoning healthcare crisis.

*Fixing American Healthcare* makes the chaos and complexity of our healthcare system understandable, and even predictable. It shows beleaguered American patients what they need to do to protect themselves. It shows discouraged American doctors what they must do to salvage their once proud, thriving, and ethical profession. And it shows how American doctors and American patients - acting solely in their own enlightened self-interest - can catalyze a transformation to a healthcare system that is fair, efficient, and compatible with American ideals.

Richard N. Fogoros, MD, the popular “DrRich” of [heartdisease.about.com](http://heartdisease.about.com), is a former cardiologist and professor of medicine, and is a webmaster, blogger, and the author of several books.

*Fixing American Healthcare* is available from most bookstores, and at <http://publishorperishdbs.com>.

**“A great and important book. ... Absolutely required reading...”**

Ken Ellenbogen, MD, Professor of Medicine and Vice Chairman of Cardiology, Virginia Commonwealth University
